

JB463 - Developing Rules Applications with Red Hat JBoss BRMS

- Overview of Red Hat JBoss BRMS
 - Learn about the architecture and business need for Red Hat JBoss Business Rules Management System (BRMS).
- Author basic rules
 - Author basic business rules using Red Hat JBoss Developer Studio (JBDS).
- Integrating Business Rules with Java Applications
 - Learn how integrate rules processing into an application using an API.
- Decision tables
 - Learn the purpose and layout of a spreadsheet decision table, and identify how JBoss BRMS loads the decision table at runtime.
- Domain-specific languages
 - Learn about the purpose of domain-specific languages (DSLs), how to declare them, and how to use them in a rule.
- Test rules
 - Learn about JUnit test and learn how to test a BRMS application.
- Author complex rules
 - Learn how to use complex features of the BRMS rules engine.
- Control rule execution
 - Learn how to implement conflict resolution strategies in rule execution.
- Debug Drools
 - Learn how to debug Drools applications in Red Hat JBoss Developer Studio.
- Complex event processing
 - Use complex event processing with rules.
