SYLLABUS- RH403

Red Hat Satellite installation

Install Red Hat Satellite 6 on a server and populate it with Red Hat Enterprise Linux software content.

Red Hat Satellite organization

Effectively control user access for Red Hat Satellite administration.

Red Hat Satellite client registration

Register hosts to a Red Hat Satellite server, both interactively and automatically.

Incorporate software management into software development life cycle

Control which packages hosts can install and which updates are propagated to hosts. Evaluate host deviations from corporate standards.

Deploy custom software using Red Hat Satellite

Incorporate non-Red Hat software packages into a Red Hat Satellite framework.

Configuration management with Puppet

Create and populate a Puppet repository within a Red Hat Satellite framework.

Centralized management and deployment of system configurations

Configure hosts using Puppet.

Deploy hosts with Satellite server

Deploy and provision hosts using PXE.

Configuration of Satellite server for enterprise system deployment

Configure host provisioning for integration with software and configuration management. Discover unprovisioned host and provision-discovered hosts.
