Indian IT industry heads to $350 billion by 2025: NASSCOM.

We are living in a tech driven age where almost all the industrial and commercial sectors get turned to tech companies to maintain their back-end system where important accounts, data and other vital detail are stored. Most of these enterprises themselves steps into the heels of digital companies enabling the customer to get connected to their services through smartphone app and websites.....

In line with Super Computers and Linux: a portfolio

A supercomputer is a computer with a high-level computational capacity compared to a general-purpose computer. Performance of a supercomputer is measured in floating-point operations per second (FLOPS) instead of million instructions per second (MIPS). As of 2015, there are supercomputers which can perform up to quadrillions of FLOPS.....
